NAASCO announces new product improvements for EC135 helicopters

Shirley, NY –FAA-PMA approval was recently granted to NAASCO Northeast Corp. for the ETR-25 “Mercury Mod™” applicable to P/N 23081-057 starter generators manufactured by Lucas/Goodrich, fitted to Eurocopter EC135 helicopters.

Jim Leslie, VP Component Overhaul remarked, “This latest modification, like all of our cost-saving ETR™ improvement programs, boasts an unprecedented 1000 hour ‘no-brush-change’ guarantee. Trend-monitoring tracking data has shown a projected brush life of between 1600 to 2600 hours with minimal commutator wear”.

Celebrating 20 years as pioneers in the field of starter generator improvement technology, NAASCO has continued to offer the best repair and overhaul value while significantly increasing their customers’ starter generator reliability, far surpassing the technologies of the past.

Since 1988, NAASCO has worked closely with helicopter operators worldwide such as, police aviation units, off-shore oil support, air ambulance, electronic news gathering and tour operators to provide cost-effective repair solutions for a variety of aircraft components. NAASCO is FAA and JAA certified.
