**NAASCO receives FAA approval for
160-Amp Starter Generator**

<http://www.naasco.com>

Shirley, NY, –NAASCO Northeast Corp. was given FAA-PMA approval for their latest **ETR-25 “Mercury Mod™”** for P/N 160SG140Q starter generators manufactured by APC, fitted to Eurocopter EC120 model helicopters.

Jim Leslie, VP Component Overhaul remarked, “This modification, like all of our ETR™ starter generator improvement programs, boasts a 1000 hour brush life guarantee.”

Trend-monitoring program tracking data sent in by several operators that have taken advantage of these improvements have reported a projected brush life of between 1200 to 1700 hours with minimal commutator wear.

NAASCO, an industry leader in the field of starter generator technology, has continued to provide cost effective performance and increased reliability for their customers, far surpassing the technologies of the past. Further modification approvals are anticipated in the near future. NAASCO holds FAA and JAA certification. Please contact NAASCO for specific application.
