**NAASCO announces new product
improvements for EC 145/BK 117 helicopters**

<http://www.naasco.com>

Shirley, NY – FAA-PMA approval was granted to NAASCO Northeast Corp. for the ETR-25 “Mercury Mod™” applicable to P/N 23081-042 and P/N 23081-043 starter generators manufactured by Lucas/Goodrich, fitted to Eurocopter EC145/BK 117 helicopters.

Trend-monitoring tracking data has shown a projected brush life of between 1200 to 2300 hours with minimal commutator wear. Jim Leslie, V.P., Component Overhaul remarked, “Celebrating over 20 years in the field of starter generator improvements, we have continued to provide increased reliability for our customers. This latest modification boasts an unprecedented 1000-hour ‘no-brush-change’ guarantee.”

Since 1984, NAASCO has worked closely with helicopter operators worldwide such as law enforcement agencies, off-shore oil support, air ambulance, corporate and tour operators, as well, to provide cost-effective repair solutions for a variety of aircraft components. NAASCO is FAA and E.A.S.A. certified.
